

# Parking on County Road B

Staff sent a parking survey to residents on County Road B and the adjacent neighborhoods to gauge the needs for parking. This assists in determining the layout of the street. The desire for parking was fairly even between residents wanting one side of the street for parking, some parking and fully eliminating parking on County Road B as show in the chart below.

## RESULTS OF PARKING SURVEY FOR COUNTY ROAD B

### What is a Parking Bay?

A parking bay is a pull out for parallel parking along a road. Example photo of Josephine Road parking bays are shown below. Please note, parking bays installed with this project would be asphalt (not concrete as shown) and would not go through driveways.

Due to the mixed survey results and a desire to maintain parking options for the homes directly on County Road B, staff has created Layout Option B. This option shows potential locations for some parking, prioritizing locations near homes that are not close to side streets.

### Help us determine the most needed locations for parking:

Please go to Option B layout and use your YELLOW or BLUE sticker to indicate locations, if any, you would like to see a parking bay.
